Coding & Solution

Date	13 July 2026
Team ID	xxxxxx
Project Name	EduGenie – Google Gemini Powered Learning Assistant
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Solution Summary:

Field	Details
Repository Link / URL	https://github.com/chaitanyasiri561/EduGenie-Learning-Assistant
Programming Language(s)	Python, HTML, CSS, JavaScript
Framework(s) Used	FastAPI, Jinja2, Uvicorn
Key Features Implemented	Question Answering, Topic Explanation, Quiz Generation, Notes Summarization, Learning Recommendations
Pending / Incomplete Features	User Authentication, Database Integration, Deployment, User Progress Tracking
Setup / Run Instructions	Install dependencies using pip install -r requirements.txt, configure .env with Gemini API key, run uvicorn main:app --reload, then open http://127.0.0.1:8000.

Code Quality Checklist:

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

The project follows a modular architecture with separate AI modules for Question Answering, Explanation, Quiz, Summary, and Recommendation. FastAPI handles backend requests, while Google Gemini API and Hugging Face models provide AI-powered learning assistance. The project is version-controlled using GitHub and can be extended with authentication, database support, and cloud deployment.
