Solution Requirements

Date	*13 July 2026*
Team ID	-
Project Name	EduGenie – Google Gemini Powered Learning Assistant
Maximum Marks	4 Marks

Define Functional and Non-Functional Requirements:

Create a comprehensive list of requirements to define exactly what your solution will do and how well it will perform.

- **Functional Requirements (FR)** define specific behaviors, functions, or features of the system (What the system should *do*).
- **Non-Functional Requirements (NFR)** specify the criteria that judge the operation of a system, rather than specific behaviors (How the system should *be*).

Fill out the descriptions and necessary details for each category provided below.

Step 1: Functional Requirements (FR)

S.No	Requirement Category	Requirement Description	Priority (High/Medium/Low)
1	Authentication	Users can securely access the application and use learning features.	High
2	Authorization levels	*Student users can access AI Question Answering, Notes Summarizer, Quiz Generator, Topic Explanation, and Recommendations.*	High

3	External interfaces	*Integrates with Google Gemini API for AI responses.*	High
4	Transactions processing	*Processes user questions, notes, and quiz requests in real time and returns AI-generated results.*	High
5	Reporting	*Displays quiz scores, learning progress, and generated study materials.*	Medium
6	Business rules, etc.	*AI generates answers only from user queries and provides educational content.*	High
7	Compliance to laws or regulations	*User data is handled securely and follows privacy policies.*	Medium
8	*Other*	*Allows downloading notes and retrying quizzes.*	Medium

Step 2: Non-Functional Requirements (NFR)

S.No	NFR Category	Requirement Description	Target Metric / Acceptance Criteria
1	Performance & Speed	*AI responses should be generated quickly.*	*Response within **5 seconds***
2	Scalability	*System should support many students simultaneously.*	*Supports **500+ concurrent users***
3	Security & Data Privacy	*API keys and user data are securely protected.*	*HTTPS + Secure API key storage*
4	Reliability & Availability	*Application should remain available most of the time.*	*99% uptime*
5	Usability & Accessibility	*Simple, responsive, and easy-to-use interface.*	*Works on desktop and mobile browsers*
6	*Other*	*Easy maintenance and future feature expansion.*	*Modular Python/FastAPI architecture*
