

## No. of Functional Features Included in the Solution

|                      |                                                     |
|----------------------|-----------------------------------------------------|
| <b>Date</b>          | 13 July 2026                                        |
| <b>Team ID</b>       | XXXXXX                                              |
| <b>Project Name</b>  | EduGenie – Google Gemini Powered Learning Assistant |
| <b>Maximum Marks</b> | 5 Marks                                             |

### Functional Features Overview:

This document lists all the functional features included in the project solution. Each feature is described with its purpose, implementation status, and contribution to the overall solution.

| S.No | Feature Name             | Feature Description                            | Module / Component     | Status (Done / In Progress / Pending) | Marks Contribution |
|------|--------------------------|------------------------------------------------|------------------------|---------------------------------------|--------------------|
| 1    | Question Answering       | Answers student questions using AI             | Q&A Module             | Done                                  | High               |
| 2    | Topic Explanation        | Generates easy-to-understand explanations      | Explanation Module     | Done                                  | High               |
| 3    | Quiz Generator           | Creates quizzes from a given topic             | Quiz Module            | Done                                  | High               |
| 4    | Notes Summarizer         | Summarizes study material into short notes     | Summary Module         | Done                                  | High               |
| 5    | Learning Recommendations | Suggests learning resources and next topics    | Recommendation Module  | Done                                  | Medium             |
| 6    | Responsive Web Interface | Allows users to interact with the system       | Frontend (HTML/CSS/JS) | Done                                  | Medium             |
| 7    | FastAPI Backend          | Processes requests and routes to AI modules    | Backend                | Done                                  | High               |
| 8    | Gemini API Integration   | Connects the application with Google Gemini AI | API Integration        | Done                                  | High               |

**Feature Summary:**

| Metric                             | Count / Value                                                                                         |
|------------------------------------|-------------------------------------------------------------------------------------------------------|
| Total Features Planned             | 8                                                                                                     |
| Total Features Implemented         | 8                                                                                                     |
| Core / Must-Have Features          | 5 (Question Answering, Topic Explanation, Quiz Generator, Notes Summarizer, Learning Recommendations) |
| Additional / Nice-to-Have Features | 3 (Responsive Web Interface, FastAPI Backend, Google Gemini API Integration)                          |
| Features Tested & Verified         | 8 (All implemented features tested successfully)                                                      |

**Feature Category Breakdown:**

| S.No | Category                  | Features in Category | Example Features                                    |
|------|---------------------------|----------------------|-----------------------------------------------------|
| 1    | User Interface (UI)       | 1                    | Responsive Web Interface                            |
| 2    | Backend / Logic           | 5                    | Q&A, Explanation, Quiz, Summary, Recommendation     |
| 3    | Database / Storage        | 2                    | JSON Storage, PDF Study Material                    |
| 4    | API / Integration         | 2                    | Google Gemini API, Hugging Face Models              |
| 5    | Security / Authentication | 1                    | Environment Variables (.env) for API Key Management |
