

Project Initialization and Planning Phase

Date	13 July 2026
Team ID	xxxxxx
Project Title	EduGenie – Google Gemini Powered Learning Assistant
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) report:

The proposal report aims to transform loan approval using machine learning, boosting efficiency and accuracy. It tackles system inefficiencies, promising better operations, reduced risks, and happier customers. Key features include a machine learning-based credit model and real-time decision-making.

Project Overview	
Objective	Develop an AI-powered learning assistant that provides Question Answering, Topic Explanation, Quiz Generation, Notes Summarization, and Personalized Learning Recommendations using Google Gemini.
Scope	Supports students by providing instant learning assistance through a web application with an easy-to-use interface and AI-powered educational features.
Problem Statement	
Description	Students spend significant time searching multiple websites for explanations, notes, quizzes, and study materials, making learning inefficient.
Impact	Reduces learning efficiency, increases exam stress, and affects academic performance due to scattered educational resources.
Proposed Solution	
Approach	Build an AI-based web application using Google Gemini API and FastAPI to deliver educational assistance from a single platform.
Key Features	• AI Question Answering • Topic Explanation • Quiz Generation • Notes Summarization • Personalized Learning Recommendations

Resource Requirements:

Resource Type	Description	Specification/Allocation
Hardware		
Computing Resources	CPU	Intel i5/Ryzen 5 or higher
Memory	RAM	8 GB or higher
Storage	Disk space	10 GB free SSD
Software		
Frameworks	Backend Framework	FastAPI
Libraries	Python Libraries	google-genai, transformers, torch, Jinja2, python-dotenv
Development Environment	IDE	VS Code
Data		
Data	Study topics, user queries, AI-generated responses	Text (JSON/Prompt data)
